Ground Force - a new surveying company commencing operations in January 2008 is offering a range of professional surveying services throughout Zambia.

- Cadastral Surveys
- Route surveys of roads, railways, pipelines, power-lines etc
- Providing control on large and complex engineering projects
- Topographical mapping for engineering design
- Estimation of volumes in earth movements related to major engineering works
- Mapping of river bottoms for navigation purposes

Other research and consultancy services:

- Land management
- Planning and development
- Policy impact studies

Our Mission

Contribute to Zambia's development by offering a wide range of surveying services using modern technology and the deployment of highly skilled and professional workforce.

Management

The firm's operations will be managed by Dr Emmanuel Mutale BSc MSc PhD MSIZ. A licensed land surveyor, a full member of the Survey Institute of Zambia and one of the most highly qualified and experienced Zambian land surveying professionals.

Equipment and software

Latest survey instruments incorporating software linked to micro-computer based mapping systems. This set-up provides for a more efficient, accurate and fast execution of projects. The following are some of the elements incorporated in our survey instruments:

- Field data processing
- Contouring
- Computer Aided Draughting (CAD)
- Sections
- Areas and volumes
- Terrain modelling
- Visualisation
